Corvette used for competition: 1964 White Roadster Grand Sport style body-Group IIIB

Favorite type of event: Love those Texas Lo-speeds. The high speed courses like Texas World Speedway are adrenaline charged and challenging. All in all I like all the events, the competition and the camaraderie.

Personal information: I have been in the computer field for over 30 years. I enjoy seeing the industry change and trying to keep up with it. I currently work for a Hi-Tech company which has a unique product that everyone wants and needs. It is nice to work for a place where there are so many great people, kind of like NCCC. I am not out there racing yet this year due to a quad bypass procedure in Feb '99, but watch out—I will be back.

What made you decide to compete for points? I had the time and desire to be there. I love the competition and meeting the wonderful people all over the country. You wouldn't believe just how many from coast to coast. I want to say a few words to those of you who Diana and I met this year. "You guys and gals are the greatest!" THANKS to all of you. Without you we never would have made it through the year.

Advice for anyone wanting to compete at the national level: Bring your credit cards, convince your wife to compete along with you, and be prepared to do a lot of traveling! It also helps to have a competitive car and lots of seat time. This is a huge commitment of time and money resources. Plan on having lots of fun. By the time you are done you will have met so many great people and clubs out there that you won't believe it.
